Live Project: skillshare-app-vercel-xv9i.vercel.app | Giridih, Jharkhand, India

OBJECTIVE

Full Stack Java Developer (B.Tech CSBS, 2027) seeking an SDE internship to contribute to production-grade backend systems. Experienced in Spring Boot, Spring Security, OAuth2, REST API design, and PostgreSQL. Proven ability to independently design, build, and deploy complete web applications.

EDUCATION

Asansol Engineering College (AEC) — Asansol, West Bengal

Aug 2023 – 2027

Bachelor of Technology — Computer Science and Business Systems

SGPA: 8.88 / 10

Activities: Google Developer Student Clubs (GDSC) · Photography Club · Science Club

BNS DAV Public School — Giridih, Jharkhand

Mar 2018 – Mar 2023

Class XII (CBSE)

88%

Class X (CBSE)

92%

Carmel School — Giridih, Jharkhand

Mar 2008 – Feb 2018

Primary & Secondary Education

TECHNICAL SKILLS

Languages:

Java 17 · Python · Kotlin · C · C++ · JavaScript · SQL

Frameworks:

Spring Boot · Spring Security · Hibernate/JPA · React 19 · Flask · Jetpack Compose

Databases:

PostgreSQL · MySQL · H2

DevOps & Tools:

Docker · Maven · Git · Vercel · Android Studio · Firebase · Supabase

Concepts:

REST API Design · OAuth2 · JWT · DSA · OOPs · System Design · Microservices (basics)

PROJECTS

SkillShare — Full Stack Skill Matching Platform

Jan 2025 – Present

Stack: Java · Spring Boot · Spring Security · OAuth2 · Hibernate/JPA · PostgreSQL · Docker · React 19 · Maven · Supabase

Live: skillshare-app-vercel-xv9i.vercel.app **Code:** github.com/PG300604/skillshare-app-vercel

- Architected and built a Tinder-style full-stack web application enabling users to discover nearby skill-matched collaborators, managing the complete development lifecycle from design to deployment.
- Engineered a geolocation matching engine using the Haversine formula with dynamic radius expansion (10km → 100km), ranking results by skill proficiency score; implemented global fallback for zero-match scenarios.
- Secured the REST API with Spring Security configured as an OAuth2 Resource Server, validating Supabase-issued JWTs via JWKS endpoint; implemented stateless, CORS-enabled architecture for cross-origin deployments.
- Designed a dual-database data layer using Spring Data JPA and Hibernate — PostgreSQL for production, H2 in-memory for local development — with SQL seed scripts for consistent test environments.
- Containerized the Spring Boot backend with a multi-stage Dockerfile (Maven build stage + JRE Alpine runtime); deployed React 19 frontend on Vercel with client-side routing rewrites.
- Built the frontend with React 19 (Vite), featuring animated swipe-card UI (Framer Motion), 3D landing page (React Three Fiber), real-time messaging, and auth-gated routing via Supabase.

CERTIFICATIONS

JPMorgan Chase & Co. — Software Engineering Job Simulation

Forage · May 2026

Completed: *Project Setup · Kafka Integration · H2 Integration · REST API Integration · REST API Controller* | Credential ID: *ZfcBnHEETwwQsb3ae*

ACHIEVEMENTS & ACTIVITIES

- Mr. CSBS 2023 — Winner of personality and aptitude competition at Asansol Engineering College.
- GDSC Member — Active member of Google Developer Student Clubs, AEC chapter.
- House Captain & House Commander — BNS DAV Public School; led house activities and represented school in public speaking and cricket.
- Consistently maintained SGPA of 8.88 in B.Tech CSBS at Asansol Engineering College.
