Objective

Final year B.Tech Computer Science and Business Systems student (2027) seeking a Software Development Internship. Independently designed, built, and deployed **5 full-stack applications** spanning microservices, multi-agent AI, healthcare ML systems, and offline-first PWAs – with **3 live productions** and **1 national hackathon delivery in 24 hours**. Proficient in Java, Spring Boot, REST APIs, OOP, DSA, and DBMS.

Education

Asansol Engineering College (AEC)

B.Tech – Computer Science and Business Systems | **SGPA: 8.83 / 10** | **CGPA (till 6th Sem): 8.05**
– Activities: GDSC · Science Club

Aug 2023 – 2027

Asansol, WB

BNS DAV Public School

Class XII (CBSE): **83.5%** Class X (CBSE): **92.67%**

Mar 2018 – Mar 2023

Giridih, Jharkhand

Technical Skills

Languages: Java 17/21, JavaScript, TypeScript, Python, SQL, Kotlin, C, C++

Backend: Spring Boot, Spring Security, Spring MVC, Hibernate/JPA, REST APIs, Node.js, Flask

AI & ML: Logistic Regression, scikit-learn, Gemini API, Multi-Agent Systems, Edge Inference, SSE

Frontend: React 19, Next.js 16, Vite, Tailwind CSS, Framer Motion, Three.js

Databases: PostgreSQL, MySQL, H2, MongoDB, RDBMS, SQL Schema Design

DevOps & Tools: Docker, Maven, Git, GitHub, Railway, Vercel, Firebase, Stripe API

Core Concepts: OOP, DSA, DBMS, Microservices, Dijkstra Algorithm, JWT, OAuth2, SDLC, Agile

Projects

TriageNet – AI-Powered Hospital Triage System | *Java 21, Spring Boot, Next.js, Python, PostgreSQL* 2026 – Present

- **[Final Year Project]** Architected a healthcare triage platform connecting **4 regional hospitals** via weighted graph network using **Dijkstra** shortest-path referrals, **Hungarian algorithm** bed assignment, and a 3-way clinical matcher (beds $\wedge$ equipment $\wedge$ specialist).
- Built a **Logistic Regression** severity scorer on **7 clinical features** producing **0–100 risk scores**, with automatic Sepsis Early Warning ($SpO_2 < 90\%$, $HR > 110$) and Explainable AI risk attribution.
- Built **12 operational dashboard pages** with live simulation, patient search, and insurance workflows; secured via Spring Security + JWT, orchestrated with Docker Compose.

ZeroHour – Multi-Agent AI Productivity Platform | *React, Spring Boot, Gemini API, Firebase, Railway* Hackathon 2026

- **[CodingNinjas × Google Vibe2Ship Hackathon]** Built and deployed a **4-agent AI pipeline** (Planner→Prioritizer→Scheduler→Nudge) end-to-end in **24 hours**, integrating Google Calendar and Gmail APIs for automated scheduling and alerts.
- Implemented real-time **SSE streaming**, multimodal PDF/image ingestion via Gemini, and CSRF/IDOR-hardened REST endpoints – live at zerohour-a84d3.web.app.

ShopFlow – Full Stack E-Commerce Platform | *Java, Spring Boot, Microservices, PostgreSQL, Next.js, Stripe* 2026 – Present

- Designed **9 independently deployable microservices** with isolated schemas, JWT auth, and **Stripe webhook** payments; built inventory state machine (PENDING→COMMITTED→RELEASED) preventing concurrent oversell.

SkillShare – Full Stack Skill Matching Platform | *Java, Spring Boot, OAuth2, PostgreSQL, Docker, React* Jan 2025 – Present

- Built **Haversine geolocation engine** with **10km→100km** dynamic radius expansion, OAuth2 + JWT auth, and multi-stage Docker deployment – live at skillshare-app-vercel-xv9i.vercel.app.

SkyCheck – AI Structural Inspection PWA | *React PWA, Spring Boot, PostgreSQL, Dexie.js, Gemini API* 2025 – 2026

- **[Tata Technologies InnoVent 2026]** Co-built an **offline-first PWA** with in-browser edge AI classifying **3 defect types** via live camera feed; engineered Dexie.js IndexedDB sync with cascading ID reconciliation to PostgreSQL.

Certifications

JPMorgan Chase & Co. – Software Engineering Job Simulation (Kafka, REST APIs, H2)

Forage, May 2026

Data Structures and Algorithms: The Complete Masterclass

Udemy

Complete Kotlin Development Masterclass

Udemy, Mar 2025

Tata Data Visualisation: Empowering Business with Effective Insights

Forage, Aug 2025

Achievements & Activities

- **National Hackathon** – Shipped ZeroHour end-to-end in **24 hours** at CodingNinjas × Google Vibe2Ship Hackathon, 2026.
- **Tata Technologies InnoVent 2026** – Co-developed SkyCheck; Stage 2 Virtual POC (Oct 2026), Final Demo (Jan 2027).
- **GDSC Member** – Active in Google Developer Student Clubs, AEC chapter; technical workshops and coding events.
